Chullin 56 – Good Morning Raboisai

1️⃣ Gluda – Missing Skin

Gemara:

👉 Case:

- Animal missing **all skin (גלודה)**

📌 דין

👉 If there remains:

- **Size of a סלע (coin)** of skin

👉 Can save the animal

📌 Limitation

👉 Skin on:

- **Lower part of the leg (בית הפרסות)**

👉 Does **NOT** count

👉 Animal remains טריפה

2️⃣ מחלוקת – Skin of Lower Leg

👉 **רבי יוחנן**:

- Even skin of lower leg
  👉 Can save

📌 But

👉 This is:

- **דעת יחיד**

👉 Not accepted

3️⃣ יסוד

👉 Some skin areas:

- Considered like **בשר (flesh)**

👉 Not like protective skin

👉 Therefore:

- Cannot save the animal

4️⃣ Transition – Birds

👉 Mishnah moves to:

- **טרפות in birds**

📌 Examples

👉 Hole in טריפה → וושט

👉 Split in טריפה → קנה

📌 Difference

👉 וושט:

- Small hole enough

👉 קנה:

- Needs larger damage

5️⃣ Weasel Attack (חולדה)

👉 Case:

- Weasel bites head of bird

📌 Concern

👉 Did it:

- Penetrate skull
- Reach brain

6️⃣ How to Check – Method 1

👉 Press from:

- Inside palate upward

📌 Result

👉 If brain comes out → טריפה
👉 If not → כשר

📌 Assumption

👉 Brain coming out =

- Both membranes punctured

7️⃣ Challenge

👉 Maybe only:

- Outer membrane punctured

📌 Answer

👉 Inner membrane:

- Very thin

👉 Pressure will:

- Force brain out

8️⃣ Ziri's Statement

👉 Initially:

- Cannot rely on this test

👉 Because:

- Teeth are very fine

📌 **Revised**

👉 Can check

👉 But:

- Not with fingernail

9️⃣ **Alternative Method**

👉 Use:

- Sharp object (pin / needle)

👉 Move across membrane

👉 If catches:

- Hole exists → טריפה

🔟 **Concern**

👉 Tool itself may:

- Create hole

👉 Therefore:

- Debate how to check

1️⃣1️⃣ **סוגיא – Membrane Importance**

👉 If skull breaks:

- Does membrane matter?

📌 **Answer**

👉 In some birds:

- Membrane too thin

👉 Not considered protection

👉 Automatically טריפה

1️⃣2️⃣ **Special Case – Water Birds**

👉 Membrane:

- Extremely thin

👉 Therefore:

- No need to check

👉 Hole in skull → טריפה

1️⃣3️⃣ **Additional Checking Methods**

👉 Fill cavity with:

- **Water**

👉 See if it leaks

👉 Or use:

- Straw / wheat strands

👉 Detect small holes

1️⃣4️⃣ **Burning Case (Fire Damage)**

👉 Bird fell into fire

📌 **דין**

👉 If internal organs:

- Change color → טריפה

📌 **Example**

👉 Red organs → turned green → טריפה

1️⃣5️⃣ **Important חילוק**

👉 If organ:

- Naturally green → כשר

👉 Only:

- **Change in color** matters

1️⃣6️⃣ **Which Organs**

👉 Key organs:

- Liver
- Heart
- Gizzard

👉 Change color → טריפה

1️⃣7️⃣ **Boiling Test**

👉 If color changed

👉 Place in hot water

👉 If returns to normal:

- כשר

👉 If not:

- טריפה

📌 **Reason**

👉 Sometimes discoloration:

- Only surface effect (smoke)

❗ **Limitation**

👉 Do NOT test:

- If no visible issue

1️⃣8️⃣ **נפולה – Bird Damage**

👉 Bird:

- Stepped on / thrown

📌 **דין**

👉 If survives **24 hours**:

- כשר

📌 **But**

👉 Still must check:

- Spinal cord

1️⃣9️⃣ **New Mishnah – כשרות בעוף**

👉 Lists kosher cases

📌 **Examples**

👉 Small hole in כשר ⟶ קנה

👉 Weasel bite not reaching brain → כשר

👉 Crop (זפק) removed → כשר

👉 Intestines came out but not punctured → כשר

2️⃣ 0️⃣ **Additional Cases**

👉 Broken wings → כשר
👉 Broken legs → כשר
👉 Large feathers removed → כשר

👉 But:

- Small feathers removed → פסול

2️⃣ 1️⃣ **Womb (רחם) Removed**

👉 Case:

- Removed

📌 **Discussion**

👉 Compared to:

- זפק (crop)

👉 Unclear if:

- Same leniency applies

👉 Remains:

- ספק

2️⃣ 2️⃣ Crop Boundary (זפק → וושט)

👉 Narrow area where crop becomes esophagus

📌 דין

👉 Has דין like:

- וושט

👉 Small hole → טריפה

2️⃣ 3️⃣ Intestines Reinserted

👉 If intestines came out

📌 Condition

👉 Must return:

- In correct order

👉 If reversed:

- טריפה

📌 יסוד

👉 Body structure:

- Must remain exact

2️⃣ 4️⃣ Story – Intestines Reinserted

👉 Case:

- Intestines came out

👉 Returned incorrectly → טריפה

👉 Correct structure essential

2️⃣5️⃣ Final יסוד

- Skin must be in valid location to protect
- Brain puncture depends on membranes
- Multiple methods exist for checking
- Color change indicates internal damage
- Structure of body must remain intact
- Birds have unique halachos vs animals

🔑 Key Takeaways

- A small patch of skin can save a skinless animal, but not if it's in the wrong place
- A weasel bite requires checking if the brain membranes were punctured
- There are multiple practical ways to test for internal damage
- Color change in organs indicates serious internal injury
- Surviving 24 hours removes concern of internal crushing, but further checks are still needed
- Many bird injuries that look severe are still kosher
- Body structure must remain intact — incorrect repositioning can make it treifa
- Location and type of damage are critical in determining status
