
Chullin 97 – Good Morning Raboisai

1️⃣ Gid Hanasheh in a Pot

Gemara:

👉 Case:

- Gid hanasheh cooked with meat

📌 Rule

👉 If it gives flavor:

- Entire mixture is forbidden

👉 If not:

- Permitted

2️⃣ Roasting vs Cooking

👉 Cooking:

- Flavor spreads → can forbid

👉 Roasting:

- Flavor stays inside

👉 Therefore:

- Less concern of issur spreading

3️⃣ Fat vs Gid

👉 Fat:

- Spreads easily → forbids mixture

👉 Gid:

- Does not spread as much

📌 **Result**

👉 Different halachos

4️⃣ **Cases Where Fat Does Not Spread**

👉 Skinny animal

👉 Fat inside membrane (kidney area)

📌 **Reason**

👉 Barrier prevents spreading

5️⃣ **Using a Non-Jew to Taste**

👉 Case:

- Mixture where Jew cannot taste

📌 **Rule**

👉 Use a non-Jew (professional taster)

👉 If no forbidden taste:

- Permitted

6️⃣ **Key 3 – דוי' Ways to Check**

👉 1. Taste (tam)

👉 2. Non-Jew taster

👉 3. Ratio of 60 (bitul)

7️⃣ When to Use Each

👉 Taste:

- When permitted to taste

👉 Non-Jew:

- When Jew cannot taste (e.g. milk & meat)

👉 Ratio (60):

- When taste cannot be determined

8️⃣ Bitul – What Counts in 60

👉 Includes:

- Meat
- Gravy
- Contents of pot

👉 Machlokes:

- Whether pot itself counts
- Or only absorbed flavor

9️⃣ Measuring Taste

👉 Use neutral items:

- Onion / leek

👉 Not extreme flavors

🔟 Gid Not Counted

👉 Gid hanasheh:

- Cannot be part of the 60

👉 Reason:

- It is forbidden itself

1️⃣1️⃣ Egg Case

👉 Non-kosher egg in mixture

👉 Same rule:

- Cannot count toward 60

1️⃣2️⃣ Udder (K'chal) Case

👉 Contains milk inside

👉 If cooked with meat:

- Need 60

📌 Difference

👉 K'chal itself:

- Can count toward 60

👉 Reason:

- Basically permitted item

1️⃣3️⃣ Why K'chal Becomes Forbidden

👉 Meat flavor enters milk inside

👉 Then returns

👉 Creates:

- Milk & meat issue

1️⃣4️⃣ Secondary Mixture

👉 If K'chal falls into another pot:

- Can forbid that pot

1️⃣5️⃣ Measuring K'chal

👉 Measure:

- Based on meat part

👉 Not milk (unknown amount)

1️⃣6️⃣ Rabbinic Status

👉 K'chal treated as:

- Neveilah (Rabbinic)

👉 Therefore:

- Can forbid other mixtures

1️⃣7️⃣ Final Points

- Flavor determines issur in mixtures
- Cooking spreads flavor, roasting limits it

- Fat spreads more than gid
- 3 methods: taste, non-Jew, or 60 ratio
- Only permitted items count toward 60
- K’chal is a unique case (partly permitted)
- Secondary transfer can create new issur
