
Chullin 98 – Good Morning Raboisai

1️⃣ Egg in Mixture – Basic Rule

Gemara:

👉 Case:

- One non-kosher egg mixed with many kosher eggs

📌 Rule

👉 Needs:

- 60 to be mevatel

2️⃣ Why Eggs Are Different

👉 Eggs vary in size

👉 Therefore:

- Sometimes need extra margin

📌 Result

👉 Opinion:

- 61 against 1

3️⃣ Reason for Stringency

👉 Two explanations:

- Size differences (small vs large eggs)
- Egg is a “complete item” (beriah)

4️⃣ Egg with Chick Inside

👉 If egg contains developed chick:

- Treated as neveilah

👉 Therefore:

- Gives flavor → forbids mixture

5️⃣ Regular Tamei Egg

👉 Even without chick:

- Can give flavor

👉 Therefore:

- Can forbid mixture

6️⃣ Ratio Calculation Issue

👉 Case:

- Forbidden fat fell into pot

👉 Question:

- Can we count absorbed food in pot walls?

📌 **Two views**

👉 Include absorbed contents

👉 Or only what is visible in pot

7️⃣ Measuring the Issur

👉 Only current amount counts

👉 Not original size before cooking

8️⃣ Half-Size Issur

👉 Case:

- Half kezayis of forbidden fat

📌 Rule

👉 Still treated seriously

👉 Opinion:

- Even half-shiur is d'Oraysa

9️⃣ Cannot Be Lenient

👉 Attempt to reduce ratio (e.g. 30 instead of 60):

- Rejected

👉 Must follow:

- Full 60

🔟 Source of 60

👉 Derived from:

- Foreleg of korban (zeroa)

👉 Ratio between:

- One part vs whole animal

1️⃣1️⃣ Alternative View – 100

👉 Some hold:

- Need 100

👉 Based on:

- Only counting edible meat

1️⃣ 2️⃣ Special Case – Zeroa

👉 Cooking foreleg with animal:

- Torah allows

👉 Even though:

- Flavor mixes

📌 Important

👉 This is a special דין

👉 Not general rule

1️⃣ 3️⃣ Min B'Mino (Same Type)

👉 Rabbi Yehuda:

- Same-type mixtures not batel

👉 Even in large ratio

1️⃣ 4️⃣ Proof from Yom Kippur Blood

👉 Bull blood mixed with goat blood

👉 Still called:

- Separate identities

👉 Shows:

- Not batel

1️⃣5️⃣ Why Not Learn from Zeroa

👉 Because:

- Zeroa is special היתר

👉 Cannot apply generally

1️⃣6️⃣ Key כלל

👉 Normally:

- Do not nullify issur intentionally

👉 Only:

- After the fact

1️⃣7️⃣ Purpose of 60 Rule

👉 Not strict Torah rule

👉 Rabbinic safeguard

👉 More stringent than simple majority

1️⃣8️⃣ Final Points

- Eggs require special care (size + beriah)
- Flavor determines issur
- 60 is standard, some say 100
- Pot absorption debated
- Half-shiur still significant
- Same-type mixtures may not be batel
- Zeroa case is unique, not general
- Bitul is generally post-fact, not intentional
